

Kindling Advanced Planning Solutions

Kindling Integration *PRINCE2 Model*

Are you using PRINCE2 (P**RO**jects **I**N **C**ontrolled **E**nvironments) as your Project Management Methodology?

The Kindling Planning Methodology can easily integrate into the PRINCE2 Project Management Model.

The PRINCE2 Project Management Model is one of the most popular project management methodologies due to the product-based planning requirements. It focuses on product delivery and encourages formal recognition of responsibilities and focuses on what a project is to deliver, activities needed to produce the product and required resources. The Kindling Project Planning Workshop easily integrates into the Planning Phase due to the encouragement of team involvement for plan development. At the end of a Kindling Workshop, the Project Manager will have an actionable project plan as well as buy-in from the project team.

Utilizing the Kindling Planning Methodology with the PRINCE2 methodology will establish consistent planning guidelines that will make your organization more efficient and effective each time you conduct a Kindling Project Planning Workshop.

PRINCE2 Model
